## Aim:

Write a Java code for handling the exception.

## **Source Code:**

## q222/handleError.java

```
package q222;
import java.util.Random;
public class handleError {
   public static void main(String args[]) {
      int a = 0, b = 0, c = 0;
      Random r = new Random(100);
      for(int i=0;i<32;i++)
         try
         {
            b=r.nextInt();
            c=r.nextInt();
            a=12345/(b/c);
         }
         catch(ArithmeticException e)
            System.out.println("Division by zero.");
         }
         System.out.println("a: "+a);
   }
}
```

## Execution Results - All test cases have succeeded!

Test Case - 1
